

## EDUCATION

### IIIT HYDERABAD

B.Tech in Computer Science

August 2017 - May 2021 (expected)

CGPA: 8.81/10.0

## SKILLS

### Day to Day:

• C • C++ • Python • Bash • SQL • CSS • HTML5

### Familiar:

• Javascript • Matlab • Django • Flask • Bootstrap • Numpy • Git • Linux

## POSITIONS

- **Teaching Assistant:** Manage class of about 250 students for Psychology course.
- **Class Representative:** Act as a mediator between students and faculty.
- **Open source contributor** at Codeuino and TheAlgorithms.
- **Team Leader** for several projects done in college.

## RELEVANT COURSES

• Computer Programming • Data Structures • Software Analysis • Engineering Systems • Operating Systems • Database Systems • Distributed Systems • Graphics • Artificial Intelligence • SMAI • Machine Learning • Information Security • Data Mining • Hydrological Modelling • Complexity Theory

## ACHIEVEMENTS

- One out of 1523 fellows selected for the prestigious **KVPY scholarship** (2016-2017) by IISC and DoST, Government of India
- Secured IIT JEE (mains) rank **990** among 1.2 million people
- Secured IIT JEE (advanced) rank **1953** among .15 million short listed people

## CODING PROFILE

- Codeforces max rating **1531**
- Secured **1753rd** global rank among 8K people in Google kick start round D 2020
- Secured **1901st** global rank in Round 1 of Facebook Hacker Cup 2020

## WORK EXPERIENCE

### SOFTWARE TRAINEE ONEPLUS

Hyderabad | Delayed due to virus outbreak

### SOFTWARE DEVELOPER MYHEALTHBUDDY

June 2020 – August 2020 | WFH

- Automated the manual task of entering customer sale details into the database by creating dynamic forms.
- Worked on role based dashboard and added functionalities specific to the role.

### SOFTWARE ENGINEER AIDED

May 2019 – September 2019 | Hyderabad

- As a software engineer my role was to setup and manage the website, web-application and database for the company.
- Designed automated reports based on the data entered through the web application.

### RESEARCH ASSISTANT LAB FOR SPATIAL INFORMATICS

January 2020 – Present | Hyderabad

- Analyze how water and energy zones of India vary with rainfall and temperature.
- This analysis was done at different temporal and spatial scales to account for different climatic conditions.

### RESEARCH ASSISTANT DATA SCIENCE AND ANALYTICS CENTER

July 2020 – Present | Hyderabad

- Developing a dataset hosting platform for medical datasets under the guidance of **Prof Vikram Pudi**.

## SELECTED PROJECTS

### LINUX SHELL OPERATING SYSTEMS | C

- Implemented a bash like shell for Linux with support for piping, redirection and several other commands, written using system calls.

### SCALABLE WEB CACHE DISTRIBUTED SYSTEMS | PYTHON

- Built a miniature scalable web cache for distributed setting which handles simultaneous requests from multiple clients.

### SQL ENGINE DATABASE SYSTEMS | PYTHON

- Built a mini sql engine which runs a subset of sql queries using command line interface.

### AI BOT ARTIFICIAL INTELLIGENCE | PYTHON

- Implemented an AI bot using Minimax algorithm and Alpha-Beta pruning which plays ultimate tic tac toe (modified version of tic tac toe).

### FACE CLASSIFICATION MACHINE LEARNING | PYTHON

- Performed classification on face images and compared the results by applying different feature transformations and models.

### MARKET-BASKET ANALYSIS DATA MINING | PYTHON

- Extract associations among items bought by customers by applying apriori algorithm on transaction data.
